EXPERIENCE

Planned Career Break, San Francisco, California
Immigration

Sep 2024 - Feb 2025

- Was awaiting U.S permanent residency and work authorization
- Focused on personal and professional development, improving skills in Full-Stack development and CI/CD deployment

Alteryx, San Francisco, California

Mar 2022 - Aug 2024

Full-Stack Software Engineer

(React.js / Express.js / PostgreSQL / Google Apps Script)

- Delivered Snowflake Partner Connect integration within two months, overseeing the entire process from requirements identification to production deployment while managing two contract employees
- Optimized user experience by implementing Use in Workflow feature; effectively saving 8 user actions
- Led Designer Cloud (Alteryx flagship product) Usability Enhancement project; improved workflow view utilizing GoJS visualization library
- Established OAuth2 authentication for Looker Studio integration
- Delivered multiple A/B testing experiments in the Trifacta product, one of which increased activation metric by 60% and became a permanent feature
- Improved early Alteryx cloud product's (Trifacta) A/B testing framework by (1) outlining the testing strategy; (2) developing Unit testing framework and (3) allowing experiment segment data to be easily accessible in all contexts of the front end code

Consilient Labs, San Francisco, California

Jan 2021 - Mar 2022

Front-End Software Engineer

(Angular.js / PostgreSQL / Python)

- Worked as a lead front-end engineer, building the foundation for the Consilient Labs AI Dashboard
- Developed interactive data visualizations with D3.js, enabling users to identify key trends with more confidence
- Designed a REST API interface for storing and retrieving user settings, easing user's frustrations
- Delivered multiple customer-requested features

EDUCATION

B.Sc. in Computer Science at **University of San Francisco**

Aug 2017 - May 2021

- **Capstone Project:** Demo dashboard for Consilient Labs
